Node 10 Experimental

- Worker Threads

- Top level `await` in REPL

- fs Promises API

- NodeChakra release with Time Travel Debugging

fs Promises API

```javascript
const fsPromises = require('fs').promises;
async function openAndClose() {
  let filehandle;
  try {
    filehandle = await fsPromises.open('thefile.txt', 'r');
  } finally {
    if (filehandle !== undefined)
      await filehandle.close();
  }
}
```
